

Election Forum

**Co-governance means around water,
towards 350ppm atmospheric CO2**

asked of a Labour, Green, Mana and New Zealand First representative panel

What forms of co-governance can these parties offer – between themselves and with tangata whenua – regarding water quality, biodiversity, minimum flows, recreation, irrigation, pollution, zone committees, metering and costs, sustainable food and renewable energy production, coal-seam fracturing, climate change risks, etc?

**Monday 21 November 2011, 7.30pm at the WEA,
59 Gloucester Street, Christchurch. All welcome**
